One of the highly effective naturopathic treatments available to us is called **Mineral Infrared Therapy**. This non-invasive, non-surgical machine uses a blend of the minerals found in the human body to create an infrared electromagnetic emission exactly in the spectrum of the minerals of your body.

This emission penetrates six inches into the body and causes what is called a "resonance" of these minerals which are then liberated from the oxidized condition and are once again available as enzyme co-factors. You may or may not understand that, but the bottom line is that this treatment is effective for all conditions which involve enzyme dysfunction, in other words almost all conditions. The term used for MITs effect is "normalization of tissue."

The human body contains about 60 minerals elements, and has unique frequencies between 4-15 micrometers. When these minerals are imbalanced, one falls ill. The Mineral Frequency Device is a heated device that uses the mineral displacement pad made from the essential elements and gives specific frequencies when energized, that work to replace the energy that we should obtain from the sun but are lacking due to atmospheric absorption.

They have been proven to have a positive, safe and healing effect on human beings. Clinical studies have shown the device has the capacity to help arthritis, reduce pain and inflammation and has multiple applications for muscle, bone, skin and internal organs. The device is safe and easy to operate and can produce increased synergetic healing effects when used with other herbal therapies.

Main treatment sites are the back of the neck, used to help sleep, and other nervous disorders: the upper chest are for circulation for lung and heart: the throat for adjustments of thyroid and thymus: abdominal area for liver, stomach, spleen and pancreas: lower back for the kidneys and adrenal function. It is also very effective at healing to heal stubborn sores and wounds. Over 10,000 doctors and patients are using this device in the United States.

The MIT’s mineral plate is coated with a proprietary mineral formulation consisting of 33 trace elements… a combination essential to living organisms and the human body. When heated, these minerals emit a wavelength of 4-15mm (narrow far infrared frequency) onto areas of the body to be
treated. The emitted frequencies excite the minerals of our bodies on a molecular level, causing similar oscillations in our own elemental components.

Thus we have essentially taken in these frequencies, absorbed them and allowed them to supplement our own natural (or unnaturally altered) trace-element frequencies. Through continued use of the MIT, the constant and consistent frequencies given off by the natural elements on the disc will cause our own deficient trace element frequencies to resonate at their natural amplitudes, adjusting our biochemical pathways in the meantime. This type of balancing method has proven very useful in helping with many ailments, both common and rare.

The MIT penetrates about 3-8 inches into the body, producing such amazing and long-lasting effects as

- relief of muscular aches, pains and sinusitis symptoms
- alleviation of inflammation and edema
- promotion of healing effects on internal organs and bone fractures
- improvement of soft tissue injuries

For soft tissue injury, use the MIT on the affected area(s) at a distance of 12 inches for 20 to 30 minutes daily. It will help alleviate pain and hematoma, increase circulation to the injured area, enhance the strength of muscle tendons, and promote tissue regeneration. For best results, use the MIT in combination with Myosteo and Bathdetox. Both herbal formulas have been found effective in relieving pain associated with injuries, arthritis, sciatica, fibromyalgia and more.
