Reason for consultation

Patient Signature _____ Date: _____

Parent or Guardian if under 18 _____

OPTIONAL: Request prayer and/or spiritual counseling () Yes () No

WHY DO I (THE PUBLIC) NEED TO JOIN THE PMA MEMBER SHARE NETWORK?

Millions of families are realizing that conventional medicine is *sick care* and not *health or wellness care*. The conventional *sick care* protocol is to wait until illness and disease manifest before stepping in with chemical medications, drugs and surgery and while this is certainly a blessing for accidents, trauma and life threatening conditions, it is not a system that promotes health and wellness and having only conventional medicine as a choice leads to what we have now - *a sick and medicated society*. We live in a time where the overuse of antibiotics renders them ineffective against many strains of bacteria, a time where the hospital is one of the more dangerous places for the suffering. Society has been trained to run to "sick care" for all health woes, emergency and routine...

***Safe, natural health care is not intended to replace emergency medicine,
it is simply a better choice for non-emergency, routine and chronic illness!***

Millions of families are waking up to health and wellness, to safer natural options to prevent illness and to effectively and safely treat routine health conditions. Many more are realizing there is a better and less expensive way than chemical medications for chronic conditions.... The investment in health wellness now rivals that being spent on sick care, unfortunately though finding a qualified practitioner of alternative health options is not so easy.

Governmental regulatory boards control what health care practitioners may say to you, what services they may offer and what treatment they can prescribe and when practitioners venture outside these rules they are blatantly inviting board wrath. The result of such violation can range from hefty fines, suspension to loss of license and most conventional providers either shy away from alternatives or risk only a small offering in an attempt to appease patients that are demanding safer alternatives.

Natural health practitioners generally attempt to operate "under the radar" and are not typically recognized or regulated by any agency, state or otherwise even in states that have passed health freedom legislation. This of course means they are not accountable for the services they offer and this lack of accountability invites anyone to "hang out a shingle" and offer services. There is simply no way of knowing whether a practitioner is a qualified professional or not.

The Member Share Network addresses these issues by providing a constitutionally protected "safe haven" for qualified practitioners to provide safer health care options and the network protects both the state licensed provider as well as the natural health practitioner. To be accepted as a network provider each practitioner must successfully meet specific educational standards and complete a comprehensive process including back ground investigation, verification of credentials, past complaint and risk analysis and more.

Once licensed as a Network provider the practitioner is accountable to the PMA license rules and regulations and a complaint process is in place to hold practitioners accountable to high standards. While the Network, not unlike state agencies, cannot guarantee that any provider or the services they provide are right or suitable for any individual, members can rest easy knowing that the Network is populated with verified professional health care providers from every field of health care in virtually all U.S. States, Canada and multiple other Countries including mental health

counselors, medical doctors, pastors, chiropractors, natural health professionals, acupuncturist, herbalist, energy medicine professionals and more.

By joining in membership with our providers through the Member Share Network, both the providers' right to offer you safer alternatives, and your right to access them is constitutionally protected!

**Joining Member Share is required to receive services from network providers
and besides, it is after all the perfect way to take charge of your own health!**

A whole new world of safe and effective health care options is available to members and to learn more, much more.... you simply need to join us. Once you register as a member you will have access to our private library, educational section on immunizations, specialty products and even to self-care education and much more. If for some reason you decide that the Member Share network is not right for your family, you can cancel your membership at any time.

Please click on the PMA Member Share section and complete the application. Once completed, print out the completed form and bring it with you.
