Finally, an organic Mineral and Vitamin supplementation that provides all your nutritional needs in addition to promoting healthy bones and bone density. Comprehensive Wellness Daily Liquid Nutrition Formula is the Next Best Thing to Eating a Completely Balanced Diet of Healthy, Organic, and Unprocessed Foods

Manna Wellness Liquid Nutritional Formula provides organic, leading-edge comprehensive wellness nutritional support that includes over 310 of the Earth’s finest ingredients: Plant-based Vitamins, Minerals, Amino Acids, Antioxidants, Digestive Enzymes, Omega-3s, CoQ10, Whole Super Foods, Herbals and Botanicals, Cleanse and Detox Ingredients.

Manna Wellness Liquid Nutritional Formula contains Fulvic and Humic – Nature’s own nutrient activation and delivery system to the cells Fulvic and Humic delivers nutrients in their organic, “cell-ready” forms (the only form our cells and bones can recognize and readily use).

Manna Wellness Liquid Nutritional Formula contains a potent super ionic Mineral Complex that includes Calcium, Magnesium, Manganese, Zinc, Boron, Horsetail (6% Silica), Vitamin D, L-Lysine, Phosphorus, and other important elements our bones especially need – Fulvic-based to supercharge absorption and express delivery to our cells of ONLY organic “cell-ready” Mineral and nutrient complex components.

It is a mistake to think calcium supplements alone or calcium in combination with a few other minerals such as magnesium, strontium and vitamin D3 are really enough to stop bone loss and osteoporosis in its tracks. This has been proven in major study after study, including clinical trials for osteoporosis drugs such as Fosamax where calcium, mineral and vitamin D3 supplementation were used in all groups including the placebo group. The placebo group ALWAYS lost bone density!

Manna Wellness Liquid Nutritional Formula is far superior to any calcium and mineral supplement on the market today including Coral Calcium or Calcium-Magnesium-Vit D3 combination products, or amino acid chelated forms of calcium and other minerals.

HELPS TO RESTORE AND MAINTAIN A HEALTHY PH BALANCE

Our bodies rely on Minerals—Minerals are alkaline (and vitamins as co-factors to minerals) to neutralize acids and maintain a healthy pH balance. Normal cellular metabolism produces acids as end products. Our diets tend to be highly acidic. Emotional and mental states of anxiety, stress, fear, and worry are also extreme acid producers.

When our diets are mineral deficient, our bodies become acidic, our tissues become inflamed, and eventually we become prone to disease. Humic and Fulvic are produced in soils by beneficial microbes. Humic and Fulvic acids make it possible for plants and humans to receive nutrition, especially minerals and vitamins needed to be healthy and thrive.

One of Humic and Fulvic’s functions is to transform inorganic minerals (rocks) in the soil into their activated, organic and ionic “cell-ready” forms that plants can use. They also help to maintain a healthy pH balance and prevent a buildup of acids normally produced in metabolic processes.

CONTAINS POWERFUL ANTIOXIDANTS TO NEUTRALIZE DAMAGING FREE RADICALS

Our bodies naturally produce free radicals in metabolic processes and the antioxidants our bodies naturally produce can typically handle this challenge. When our bodies are in a state of chronic acidity and inflammation (as most Americans’ bodies are), more free radicals are produced than the body can normally handle. Oxidative stress is a result of too many oxidants and causes a great deal of cell, tissue and organ damage.

Humic and Fulvic are one of Nature’s most ferocious antioxidants because they can donate either a positive or a negative charge to neutralize a free radical on the spot, depending on which is needed. Vitamins A, C & E and Selenium, nutrients they naturally carry, are also antioxidants and help reduce radical damage.

MANNA WELLNESS LIQUID NUTRITIONAL FORMULA also contains organic berry and botanical antioxidants well-known for their ability to fight damaging free radicals: Pomegranate 4:1 Extract (Punica granatum), Noni (4:1 Extract) (Morinda citrifolia), Acai Berry, Co-Q10. A Super Berry Blend providing Polyphenols, Flavonoids—Proanthocyanidines and Anthocyanins (All 20 times more powerful than vitamin E, and 50 times greater than vitamin C) key to the superior antioxidant capabilities of berries in whole juice and extracts of Wild Blueberry (Vaccinium Angustifolium), Strawberry (Fragaria chiloensis) Cranberry (Vaccinium macrocarpon), Wild Bilberry (Vaccinium myrtillus), Elderberry (Sambucus nigra), and Raspberry (Rubus idaeus). Whole-juice phenolic concentrates of Red Grape,
Strawberry, Cherry, and Pear. Lycopene, Mangosteen, Lycium, Lutein, Grapeseed Extract, and Green Tea rich in catechin polyphenols, particularly epigallocatechin gallate (EGCG), a powerful antioxidant. EGCG has also been effective in lowering LDL cholesterol levels, and inhibiting the abnormal formation of blood clots. Pine Bark Extract is able to act as an antioxidant because it scavenges, or collects, reactive oxygen and nitrogen in the body, and slows the body’s production of peroxides. It also suppresses the production of free radicals in the system, and prevents the adhesion of several proteins that cause inflammation. Grape Skin Extract contains a high concentration of polyphenols, and Canary Island Marine Algae (*phlorotannin extract*).

ANTI-MICROBIAL SUPPORT AND IMMUNITY ENHANCEMENT

Our bodies naturally maintain a healthy microbial balance and we rely on the effects of beneficial microbes. When we receive all the nutrition our bodies need, our amazing immune system functions in tip-top shape and can produce enough healthy immune cells to help maintain this balance and also meet the challenges of invading pathogens.

Problems arise when we lose this balance. Chronic body acidity is one way we lose this balance; prescription medications and toxin exposure are others. Toxins are excreted by Candida yeast (fungus) or bacteria and other microbe overgrowth. STRESS is another primary cause of chronic body acidity, which has become “normal” – and we don’t even realize we are experiencing this chronic stress anymore. Microbes also thrive in acidic conditions, and these organisms produce even more acid.

Minerals are critical as alkalizing agents and in the production process of healthy immune cells. Chronic body acidity also results in the production of fewer number and weaker immune cells at a time when we need them most to help “clean-up” the cellular debris from damaged cells and tissues caused by acidity, oxidative stress, and free radicals, and to also protect us from pathogen challenges.

Fulvic and Humic are Natural Anti-microbials similar in strength to penicillin without the resistance-building typical of antibiotics. There are Fulvic and Humic-based anti-bacterial cleaning products used in hospitals and the food preparation industry. Pharmaceutical companies are racing to synthesize patentable molecules based on their structures. One pharmaceutical company has patented a Humic Fulvic based drug that purifies blood for transfusions, killing the HIV virus without damaging blood cells.
METABOLIC SUPPORT AND OXYGENATION

Vitamin and mineral deficiencies, especially of trace minerals affect our bodies’ ability to carry out the metabolic activities that keep us alive. Normal metabolic activities also produce acidic by-products that accumulate in our cells when we are mineral and vitamin deficient.

Once acids start to accumulate in our cells oxygen is depleted. Oxygen is critical for normal energy production (aerobic “with oxygen” respiration). When oxygen levels are too low, energy production (cellular respiration) converts to an anaerobic (“without oxygen”) state that produces an even stronger acid (lactic acid) than CO2 as a by-product—the same that is produced in muscle cells that you feel after activity that is too vigorous. Your muscles can really hurt for days (we typically cannot feel lactic acid’s effects in other tissues because they are not innervated like muscle tissue). We basically lose OUR ENERGY or CHARGE.

Giving our metabolism a boost is important in de-acidifying, detoxifying and cleansing all the cells in our bodies.

- **Humic and Fulvic** help boost our metabolism by providing all the Vitamins and Minerals and other nutrients needed to support all metabolic activities.

- **Humic and Fulvic** also DONATES ELECTRICAL CHARGES to charge up cell membranes and provides charges for cellular processes that ENERGIZE US!

- **Humic and Fulvic** also help to oxygenate the blood, so more oxygen is available for our cells to carry out normal energy production (no lactic acid) for our body. Blood oxygenation also allows the blood to carry more acidic CO2 (the primary acidic by-product in aerobic energy production) to the lungs that we release when we exhale. Proper blood oxygenation also boosts our metabolism so we feel even more energized, and as more oxygen is delivered to our brains our mental clarity and alertness skills are heightened.

CELLULAR RELEASE OF ACIDS—ELECTRICAL POTENTIAL ENHANCEMENT

Cell Membrane Electrical Potential Enhancement – A membrane electrical potential enables our cells to pass nutrients inside and acidic wastes outside the cell through the cell’s membrane...

Humic and Fulvic’s electrical potential boost improves the ability of our cells to release accumulated acids... and helps our cells receive the nutrition they need ... and we feel more energized. Without this electrical potential, cellular function becomes impaired and eventually the cell will die. Stress, lack of proper nutrition and an acidic cellular environment lowers the electrical potential of our cells and is one of the reasons we feel drained of energy and fatigued.
Humic and Fulvic and the Minerals they carry are Nature’s most potent electrolytes (polyelectrolytes) because of their ability to carry a positive or negative charge depending on a particular cell’s need.

FULVIC MOLECULES are like “MINI-BATTERIES,” imparting energy and vitality, which results in the INCREASE OF THE VIBRATORY LEVEL OF OUR CELLS AND OUR ENTIRE BODY. Fulvic has been called “THE SPARK OF LIFE” because of its ability to help restore and maintain the electrical potential and energetic dynamics of the cell membrane! Once membrane energetics and processes are restored, cells can naturally de-acidify, detoxify and cleanse and oxygenate themselves.

HEART, CARDIOVASCULAR, AND LYMPHATIC CIRCULATORY SUPPORT

MANNA WELLNESS LIQUID NUTRITIONAL FORMULA also contains organic herbal and botanical components well-known for their ability to help give our cardiovascular and lymphatic systems a boost: Humic and Fulvic and their Minerals play a key role in the regulation of blood pressure, blood pH for proper oxygenation, and normal heart contractility.

Humic and Fulvic naturally carry all the minerals in their proper proportion that our cardiovascular systems need to function optimally. Many people with hypertension report blood pressure normalization after starting to take Humic and Fulvic. Also, Humic and Fulvic chelate and remove “mineral metals” from our bloodstreams and other cardiovascular tissues that can contribute to arterial plaques.

ORGAN CLEANSE AND DETOXIFICATION

Toxins are in the foods we eat, the water we drink, the air we breathe, practically everywhere. Also if we are acidic, ACID is the most potent toxin in our body. With proper nutrition and hydration, our amazing bodies do a remarkable job ridding our bodies of normal metabolic wastes and many of the toxins we are exposed to.

One of the major problems associated with Chronic Body Acidity is our bodies’ inability to eliminate acidic wastes and toxins from our cells, tissues, and organs—they build up and the problem worsens. A detoxification or cleansing of the body organs is an attempt to jumpstart the efficiency of our organs, and starts to rid the body of a buildup of acids and toxins.

Humic and Fulvic jumpstart our organs and help them function well so they can do their job and eliminate wastes, acids, and many toxins from our bodies. Humic and Fulvic are one of Nature’s most powerful detoxification agents...so much so they are now even being used in some environmental applications. They safely neutralize many toxins, chelate heavy metals (“mineral metals”)—which they can either transform into biologically useful minerals or bind them—and safely remove them from the body.
DIGESTIVE SUPPORT AND COLON HEALTH

Concentrated Humic and Fulvic provide all the Vitamins and Minerals our bodies need to help maintain the fluid and electrolyte mineral balance and reduce the need to absorb vitamins and minerals—and all the toxins that comes with them from fecal material. Less water will also be lost from fecal material because water is necessary for the colon to absorb the vitamins and minerals which helps prevent compaction or impaction. Also vitamins and minerals are essential in the production of digestive enzymes.

Humic is also one of the BEST FIBER-like SUPPLEMENTS you can take. MANNA WELLNESS Liquid Nutrition Formula Multi-Fiber Complex includes 4 sources of fiber: Psyllium Husk and Beta Glucan to help with the healthy formation of feces to pass acidic wastes through the colon. Digestion Resistant Maltodextrin, Apple Pectin (malus domestica) A soluble fiber that has been shown to increase the excretion of lipids, cholesterol and bile acids, and reduce serum cholesterol levels, Cinnamon Bark (cinnamomum zeylanicum) a carminative to reduce formation of gas, Fenugreek seed (trigonella foenum-graecum) has shown benefit in protecting intestinal tissues. Rose Hips and Chicory Root to gently stimulate bowel movement.

MANNA WELLNESS Liquid Nutrition Formula also contains a ScFOS Prebiotic Blend digestive complex to help nourish intestinal flora and promote a healthy digestive tract.

MANNA WELLNESS Liquid Nutrition Formula includes 9 Organic Plant Digestive Enzymes to help digest food properly including Bromelain, Amylase (starch liquefying & digesting), Protease (protein solubilizing), Lipase (fat splitting), Cellulase (digestion of cellulose material), Lactase (milk and dairy digesting)

NUTRITIONAL SUPPORT

The Super Whole Food Organic Green and Fruit and Vegetable PhytoNutrient Complex in MANNA WELLNESS Liquid Nutrition Formula contains Wheatgrass (triticum vulgare-leaf), Barley Grass, Oat Grass, Rye Grass, Olive Leaf extract (olea europaea-15% oleuropein), Irish Moss (chondrus crispus-whole plant), Blue Green Algae (aphanizomenon flos-aquae), Sprouted Barley Malt, Brown Rice Bran, Nova Scotia Dulse, Chlorella, Rhubarb, Horsetail Extract (equisetum arvense-7% Silica-aerial stems), Pau d’arco (tabebuia impetiginosa), Spirulina (arthrospira platensis). Bee Pollen (apis mellifica), Royal Jelly
Whole Juice Concentrates of: Aloe Vera, Noni 4:1 Extract (Morinda citrifolia), Pomegranate 4:1 Extract (Punica granatum), Apple, Apricot, Beets, Cranberry, Green Bell Peppers, Lime, Mango, Parsley, Tangerine, Tomato, Carrot, Peach, Yellow Squash, Cantaloupe, Red Pepper Juice Concentrates. Red Grape, Strawberry, Cherry, Pear juice Concentrates.

A Super Berry Blend Providing Polyphenols, Flavonoids—Proanthocyanidins and Anthocyanins (All 20 times more powerful antioxidants than vitamin E, and 50 times greater than vitamin C) key to the superior antioxidant capabilities of Berries in Whole Juice and Extracts of Wild Blueberry (Vaccinium Angustifolium), Strawberry (Fragaria chiloensis) Cranberry (Vaccinium macrocarpon), Wild Bilberry (Vaccinium myrtillus), Elderberry (Sambucus nigra), and Raspberry (Rubus idaeus) Raspberries are rich in anthocyanins and cancer-fighting phytochemicals such as ellagic, coumaric and ferulic acid that bind carcinogens. Whole Juice Phenolic Concentrates of Red Grape, Strawberry, Cherry, and Pear. Two of the nutrients in berries—chlorogenic acid and caffeic acid, help control blood sugar thus offering protection against insulin resistance, Syndrome X and diabetes.

ENERGY, MENTAL CLARITY AND ALERTNESS

An Organic Vitamin B “cell-ready” Complex, Gingko Biloba, Ginseng, Rhodiola rosea, Cayenne, Ginger, Eleuthero, Licorice, Green tea, Alfalfa, Barley grass, Wolfberry, Spirulina, Parsley, Spinach, and Peppermint increase the ability and efficiency of cells to generate and use energy, ward off fatigue, and improve mental and physical performance.

Lecithin also provides a high amount of phosphatide concentratil. Lecithin also aids in the use of a variety of vitamins, such as A, D, and E. This increases the memory, as well as concentration of an individual. Phytochemicals found in Blueberries, can reverse age-related declines in brain function, namely the cognitive and motor deficits. Eleuthero can effectively increase mental performance and physical working capacity.
You simply can’t buy a better inclusive, liquid nutritional health supplement that provides the Organic Vitamins, Ionic Organic Minerals, Whole Foods and Nutritional Support Your Body needs to achieve OPTIMUM HEALTH AND VITALITY. Anywhere. At Any Price!
